

CineWave Entertainment

Movie Ticket Booking Management — Project Preview

PROJECT OVERVIEW

A Pega Blueprint-based movie ticket booking application that manages the booking journey from request submission through availability, approval and booking execution, with automated cost calculation, work-queue routing, SLA monitoring and customer notification.

CASE LIFECYCLE

Exact case type: Movie Ticket Request

KEY FUNCTIONAL FEATURES

- Movie & Show data objects
- Total Cost = Ticket Price × Tickets
- Premium → Premium ShowQueue
- Standard → Standard ShowQueue
- SLA: Goal 1 day | Deadline 2 days
- Customer approval + email confirmation
